

The Alabama Concrete Industries Association and the Masonry Institute of America are proud to present the

Structural Masonry Special Inspection Workshops

March 12-13, 2008 Birmingham, AL

September 17-18, 2008 Huntsville, AL

October 22-23, 2008 Mobile, AL

- Course Objective:** The course objective is to present the technical aspects, duties, and responsibilities of the Structural Masonry Inspector according to the 2006 International Building Code.
- Topics to be Covered:** General Inspection, Sampling and Testing, Masonry Materials, Mortar Preparation, Grout Preparation, Hot / Cold Weather Masonry, Masonry Preparation and Placement, Specifications, Inspection Reports, Grouting Operations, Plan Reading
- Who Should Attend:** Building Inspectors, Contractors, Architects, Engineers
- About the Instructor:** John Chrysler is a practicing Civil Engineer, Certified Masonry Inspector, and the Executive Director of the Masonry Institute of America. He has developed publications for the masonry industry based on interpretation of masonry building codes. He is author of six industry books including "Inspector Handbook" and "Masonry Inspectors Workbook." He is actively involved with the development of national building codes and national masonry codes.
- Cost of Program:** The program cost is \$350 per attendee and includes 2 days of instruction, handouts valued at \$175 and lunch. Certificates of completion will be provided, as well as learning units for architects. The ACIA is a registered AIA provider.
- Program Schedule:** 8:00 am to 4:00 pm each day
