Sustainable design is an environmentally responsible way to help lower the carbon footprint of homes in the environment and the community.

AIA architects have solutions that can help you lower residential energy usage and improve indoor air quality. AIA Architects work within your budget and design with the environment in mind.

**AIA Architects walk the walk on sustainable design.**

Architects Leading the Sustainable Evolution®  
AMERICAN INSTITUTE OF ARCHITECTS  
BIRMINGHAM CHAPTER

Concerns regarding the environment have impacted the way we think about the health of buildings and people. AIA Architects strongly believe that sustainable design practices can help both. Evidence clearly shows that incorporating sustainable design brings considerable benefit to all those who use, own, and operate health-care facilities.

AIA Architects are committed to decreasing the overall footprint of buildings, reducing emissions, energy usage, and resource dependence, while increasing indoor air quality. A walk that helps not only our health, but the health of our planet as well.
